

Deposit Mobilization Monitoring System User Manual

March 2025

Deposit mobilization monitoring System

1. Introduction

In celebration of the **20th Foundation Anniversary** of the **Cooperative Bank of Oromia**, we are proud to introduce the Deposit Mobilization Monitoring System, a cutting-edge platform designed to streamline and enhance the process of mobilizing deposits. As part of this milestone celebration, the bank has set an ambitious goal of collecting **20 billion Birr** by March 29. To achieve this target, the responsibility of deposit collection has been strategically assigned to each employee based on specific criteria, ensuring a fair and efficient distribution of tasks.

The Deposit Mobilization Monitoring System serves as a centralized platform to monitor, manage, and control the deposit collection process. It provides real-time insights into transaction processing, reporting, and user management, enabling employees to track their progress and contribute effectively to the collective goal. By leveraging this system, the bank aims to ensure transparency, accountability, and efficiency in the deposit mobilization process, while celebrating two decades of excellence and growth.

This system not only supports the bank's immediate goal of mobilizing 20 billion Birr but also reinforces its commitment to innovation and customer-centric services. As we commemorate this significant milestone, the Deposit Mobilization Monitoring System stands as a testament to the bank's dedication to leveraging technology for achieving strategic objectives and fostering long-term success.

2. User Interface Overview

To access the deposit mobilization monitoring System, use the URL of the system given to you. Open the URL in your web browser and log in using your credentials of domain username and password.

- **Login Page**
- Users access the system via a provided URL.
- The system displays the **login page**.

A screenshot of the login page. It features a blue header bar with the text "Login Page" in white. Below the header, there are two input fields: "UserName" and "Password". The "Password" field is masked with dots. A "Login" button is positioned below the "Password" field.

3. Dashboard Reports

- The overall goal or objective set for you at project 20 for 20.
- Achieved Target the actual amount you accomplished out of your total target. This reflects your progress toward your goal.
- Expected the value that should be achieved based on current trends.

4. Transaction Processing

Step 1: Navigate to the Transaction and enter the required transaction details

- Users navigate to the **Transaction Menu**.
- They enter all the **required transaction details**.
- The transaction is then **saved in the system**.

Step 2: Fill Out the Transaction Registration Form and Click the “Save” Button

4.2 View Registered Transaction

Step 1: Navigate to the Home Page and access transaction

Step 2: Then view the transaction to modify or delete it if there is an error.

The screenshot shows the 'New Transaction' page in the TRMS system. It features a table listing transactions with the following columns: Reference Number, Slip, Amount, Channel, Type, Remark, TranDate, and Actions. The table contains 5 entries, all with an amount of 1000.00. The 'Actions' column for each entry includes 'Edit', 'Details', and 'Delete' buttons. A search bar is located at the top right of the table area, and a pagination bar at the bottom indicates 'Showing 1 to 5 of 6 User'.

5. Reporting

5.1 Individual Reports:

The Individual Reports feature allows users to generate reports for specific transactions or activities based on selected criteria. These reports can be filtered by date and exported in different formats for further analysis or record-keeping.

- **Accessing Individual Reports**

- Navigate to the Reports section in the main menu.
- Click on the "Individual Report" option from the dropdown menu.

- **Filtering Reports by Date**

- A date filter option is available to narrow down the report results.
- Select the desired date range using the provided date picker.
- Click filter to generate the report based on the selected timeframe.

- **Exporting Reports**

- Users can export the generated report in the following formats:
- PDF: Click on the "Export to PDF" button to download the report as a PDF file, suitable for printing or sharing.
- Excel: Click on the "Export to Excel" button to download the report in an Excel file format, which allows for further data analysis and manipulation.

5.2 Branch Reports:

The Branch Reports feature allows users to generate reports based on specific branches and date ranges. This helps in analyzing branch-wise transactions and performance over a given period.

- **Accessing Branch Reports**

- Go to the Reports section from the main menu.
- Select "Branch Reports" from the dropdown menu.

- **Filtering Reports by Branch and Date**

- Use the Branch Selection dropdown to choose the specific branch for which you want to generate the report.
- Set the desired date range using the date picker to filter transactions within a specific period.
- Click the "Filter" button to generate the report based on the selected criteria.

- **Exporting Reports**

- Once the report is generated, users can export it in different formats:
- PDF Export: Click the "Export to PDF" button to download a PDF version of the report, suitable for printing and sharing.
- Excel Export: Click the "Export to Excel" button to download the report as an Excel file, allowing for further data processing and analysis.

The screenshot displays the TRMS (Transaction Reporting Monitoring System) interface. The top header shows the 'coop Bank of Oromia' logo and the 'TRMS' title. A sidebar menu on the left includes 'Home', 'Administration', 'Configuration', 'Transaction', and 'Report'. The main content area is titled 'Transaction Report' and features filters for 'Start Date', 'End Date', and 'Branch'. Below these filters is a table of transactions with columns for Reference Number, Slip, Amount, Channel, Branch, Type, Remark, and Transaction Date. The table shows six transactions. At the bottom of the table, there are two buttons: 'Export to Excel' and 'Export to PDF'. Arrows point to these buttons from the text in the previous section.

Reference Number	Slip	Amount	Channel	Branch	Type	Remark	Transaction Date

6. Configuration & Settings

- **Set Target Limits**

feature allows administrators to define transaction or operational limits based on user roles and positions within the system. This helps in enforcing security measures and maintaining control over user activities.

- **Accessing the Target Limits Configuration**

- Navigate to the **Configuration** menu in the main navigation panel.
- Select "**Set Target Limits**" from the available options.

- **Setting Target Limits Based on User Position**

- Enter user positions.
- Select the user position for which you want to set or modify limits.
- Enter the appropriate limits amount for the position.
- Enter the remark for this target limit and position
